PROFESSIONAL SUMMARY

Innovative and results-driven **Software Developer** with a strong foundation in full-stack web development, cloud architecture, and AI-assisted frontend engineering. Possesses over 1 year of enterprise IT experience at LTIMindtree managing complex infrastructure operations and platform deployments under strict corporate SLAs. Adept at engineering responsive web applications using Python, Flask, and MySQL, with specialized expertise in leveraging generative AI environments to accelerate modern UI/UX design workflows. Proven track record of optimizing systemic workflows, authoring rigorous technical documentation, and collaborating fluidly across agile cross-functional development teams.

TECHNICAL SKILLS

Programming & Frameworks: Python, Flask, HTML5, CSS3, JavaScript (Basic)

AI & Modern Dev Tools: AI-Assisted Frontend Generation (v0, Lovable, Claude/ChatGPT prompt engineering for UI), Git, GitHub

Databases & Cloud: MySQL, Relational Database Design, Cloud Architecture Concepts

Enterprise IT & Operations: L1.5/L2 Production Support, ServiceNow (ITSM), Technical Troubleshooting, Systems Infrastructure

Documentation: Technical Standard Operating Procedures (SOP), Knowledge Base (KB) Development, Training Manuals

KEY PROJECTS

On-Road Vehicle Breakdown Assistance Web Application — *Full-Stack Developer*

- Designed and engineered a resilient full-stack web application utilizing **Python** and the **Flask** micro-framework to provide dynamic, location-based roadside assistance routing.
- Architected and optimized a robust **MySQL** relational database schema configured to securely manage user authentication profiles, comprehensive service request logs, and real-time state tracking.
- Leveraged cutting-edge **AI-assisted development environments** to rapidly prototype, generate, and systematically refine clean, fully responsive, and semantic **HTML5 & CSS3** frontends.
- Programmed automated dispatch matching logic that streamlined user connection with localized towing, fuel delivery, and mechanical repair vendors.

AI-Driven Frontend & UI Prototypes — *Independent Developer*

- Utilized generative AI platforms to engineer modern, component-driven user interfaces, translating structured prompt architectures into valid, cross-browser compatible web layouts.
- Integrated AI-generated UI wireframes seamlessly with dynamic Python/Flask server backends to deliver interactive web controls and smooth single-page user experiences.

PROFESSIONAL EXPERIENCE

LTIMindtree — *Engineer – Cloud & Infrastructure Management*

Aug 2025 – Present | Bengaluru, India

- Deliver high-tier L1.5 and L2 technical software and infrastructure support across two major client environments, consistently maintaining 99.9% system uptime and satisfying rigorous corporate deployment SLAs.
- Collaborate with engineering teams to conduct critical Mainframe operations, including Initial Program Load (IPL) executions, dataset structures, and managed JCL permanent code migrations.
- Utilize **ServiceNow (ITSM)** deeply for prompt incident resolution, automated request fulfillment tracking, and root-cause mapping of complex infrastructure blocks.
- Authored a suite of critical transition assets including standardized **Knowledge Base (KB) articles**, developer **SOP handbooks**, and operational guides to unify documentation across internal teams.
- Facilitated cross-functional Knowledge Transfer (KT) and mentoring sessions for junior engineers, compressing baseline team onboarding cycles.

EDUCATION

B.Sc. Information Technology — *Karpagam Academy of Higher Education* Graduation: 2025 | CGPA: 8.59/10.0

Higher Secondary Certificate (HSC) — *Renuga Devi Matric Higher Secondary School*

Graduation: 2022 | Percentage: 82%

WORKSHOPS & CERTIFICATIONS

- **Automated Test Framework:** Selenium automation engineering for comprehensive end-to-end software verification (2024).
- **Cybersecurity Foundations:** Ethical Hacking technical workshop hosted by BCBUZZ Technologies (2023).

ADDITIONAL INFORMATION

- **Languages:** English (Professional Proficiency), Tamil (Native Speaker).
- **Core Competencies:** Agile Frameworks, Core Leadership, Adaptability, Structural Troubleshooting, Cross-functional Communication.
